4	Filter	5
5 to	Filter Design  Abstract—This manual provides a simple : Fourier Series	5 introduction

1. Periodic Function

Let

$$x(t) = A_0 |\sin(2\pi f_0 t)| \tag{1.1}$$

1.1 Plot x(t).

#### **Solution:**

wget https://raw.githubusercontent.com/ LokeshBadisa/EE3900-Linear-Systemsand-Signal-Processing/main/charger/ codes/1.1.py python3 1.1.py

1.2 Show that x(t) is periodic and find its period. **Solution:** If a signal x(t) is periodic then

$$x(t+T) = x(t) \tag{1.2}$$

where T is known as fundamental period. Since  $|sin\theta|$  function is periodic, x(t) is also periodic.

Fundamental Period = 
$$T = \frac{1}{2} \left( \frac{2\pi}{2\pi f_0} \right)$$
 (1.3)

$$=\frac{1}{2f_0}$$
 (1.4)

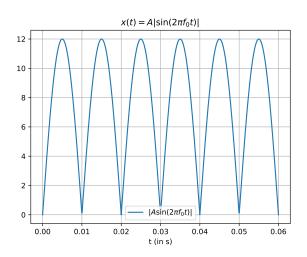

Fig. 1.1.

#### 2. Fourier Series

Consider  $A_0 = 12$  and  $f_0 = 50$  for all numerical calculations.

2.1 If

$$x(t) = \sum_{k=-\infty}^{\infty} c_k e^{j2\pi k f_0 t}$$
 (2.1)

show that

$$c_k = f_0 \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t)e^{-j2\pi k f_0 t} dt \qquad (2.2)$$

**Solution:** From (2.1),

$$x(t) = \sum_{k=-\infty}^{\infty} c_k e^{j2\pi k f_0 t}$$
 (2.3)

Mulitply  $e^{-j2\pi l f_0 t}$  on both sides

$$x(t)e^{-j2\pi lf_0t} = \sum_{k=-\infty}^{\infty} c_k e^{j2\pi kf_0t} e^{-j2\pi lf_0t}$$
 (2.4)

Integrate on both sides with respect to 't' between -T to T where T is fundamental time period of x(t).

Using (1.4),

$$T = \frac{1}{2f_0} \tag{2.5}$$

$$\int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t)e^{-j2\pi k f_0 t} dt = \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} \sum_{k=-\infty}^{\infty} c_k e^{j2\pi (k-l)f_0 t} dt$$

$$= \sum_{k=-\infty}^{\infty} c_k \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} e^{j2\pi (k-l)f_0 t} dt$$
(2.6)

The above integral:

$$\int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} e^{j2\pi(k-l)f_0t} dt = \begin{cases} 0 & k \neq l \\ \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} 1 dt & k = l \end{cases}$$
 (2.8)

$$\therefore \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t)e^{-j2\pi k f_0 t} dt = \left(\frac{1}{f_0}\right) c_k \quad (2.9)$$

$$\therefore c_k = f_0 \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t)e^{-J2\pi k f_0 t} dt$$
 (2.10)

## 2.2 Find $c_k$ for (1.1)

**Solution:**  $c_k$  can be calculated even simpler by using

$$c_k = 2f_0 \int_0^{\frac{1}{2f_0}} x(t)e^{-j2\pi k f_0 t} dt$$
 (2.11)

 $x(t) = A_0 \sin(2\pi f_0 t)$  in 0 to  $\frac{1}{2f_0}$  region. Also,

$$\sin \theta = \frac{e^{j\theta} - e^{-j\theta}}{2i} \tag{2.12}$$

Using (2.12),

$$c_{k} = 2f_{0} \int_{0}^{\frac{1}{2f_{0}}} A_{0} \left( \frac{e^{j2\pi f_{0}t} - e^{-j2\pi f_{0}t}}{2j} \right) e^{-j2\pi k f_{0}t} dt$$

$$(2.13)$$

$$= A_{0}f_{0} \int_{0}^{\frac{1}{2f_{0}}} \left( \frac{e^{j2\pi(1-k)f_{0}t} - e^{j2\pi(-1-k)f_{0}t}}{j} \right) dt$$

$$(2.14)$$

$$= A_{0}f_{0} \left[ \frac{e^{j2\pi(1-k)f_{0}t}}{-2\pi(1-k)f_{0}} \Big|_{0}^{\frac{1}{2f_{0}}} - \frac{e^{j2\pi(-1-k)f_{0}t}}{-2\pi(-1-k)f_{0}} \Big|_{0}^{\frac{1}{2f_{0}}} \right]$$

$$(2.15)$$

$$= A_{0} \left[ \frac{e^{j\pi(1-k)} - 1}{2\pi(k-1)} - \frac{e^{-j\pi(1+k)} - 1}{2\pi(k+1)} \right]$$

$$(2.16)$$

$$= \begin{cases} \frac{2A_{0}}{\pi(1-k^{2})} & k = even \\ 0 & k = odd \end{cases}$$

$$(2.17)$$

2.3 Verify (1.1) using python.

# **Solution:**

wget https://raw.githubusercontent.com/ LokeshBadisa/EE3900-Linear-Systemsand-Signal-Processing/main/charger/ codes/2.3.py python3 2.3.py

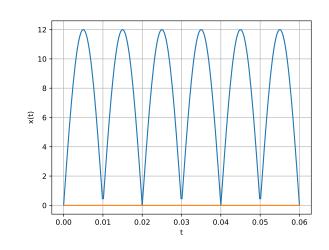

Fig. 2.3.

2.4 Show that

$$x(t) = \sum_{k=0}^{\infty} (a_k \cos 2\pi k f_0 t + b_k \sin 2\pi k f_0 t)$$
(2.18)

and obtain the formulae for  $a_k$  and  $b_k$ . **Solution:** Using (2.1),

$$x(t) = \sum_{k=-\infty}^{\infty} c_k e^{j2\pi k f_0 t}$$
 (2.19)

As,

$$e^{j2\pi kf_0t} = \cos(2\pi kf_0t) + j\sin(2\pi kf_0t)$$
 (2.20)

Substituting leads to

$$x(t) = \sum_{k=-\infty}^{\infty} c_k \left[ \cos(2\pi k f_0 t) + j \sin(2\pi k f_0 t) \right]$$
(2.21)

$$= \sum_{k=-\infty}^{\infty} c_k \cos(2\pi k f_0 t) + j c_k \sin(2\pi k f_0 t)$$
(2.22)

$$= \sum_{k=-\infty}^{-1} \left[ c_k \cos\left(2\pi k f_0 t\right) + j c_k \sin\left(2\pi k f_0 t\right) \right] + c_0 + \sum_{k=-\infty}^{\infty} \left[ c_k \cos\left(2\pi k f_0 t\right) + b j c_{\overline{k}} \sin\left(2\pi k f_0 t\right) \right] = 0$$

$$(2.23) \quad 2.6^{-1} \text{Verify } (2.18) \text{ using python.}$$

$$\text{Solution:}$$

$$\sum_{k=-\infty}^{\infty} \left[ c_k \cos\left(2\pi k f_0 t\right) + j c_k \sin\left(2\pi k f_0 t\right) \right] + \sum_{k=-\infty}^{\infty} \left[ c_k \cos\left(2\pi k f_0 t\right) + b j c_{\overline{k}} \sin\left(2\pi k f_0 t\right) \right] = 0$$

$$= \sum_{k=1}^{\infty} \left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0 + c_0$$

$$= c_0 + \sum_{k=1}^{\infty} \left[ (c_k + c_{-k}) \cos(2\pi k f_0 t) + j (c_k - c_{-k}) \sin \frac{\text{codes/2.6.py}}{(2\pi k f_0 t)^2} \right] 2.3.\text{py}$$
(2.25)

Replacing  $(c_k + c_{-k}) \rightarrow a_k$  and  $j(c_k - c_{-k}) \rightarrow$ 

$$= c_0 + \sum_{k=1}^{\infty} (a_k \cos 2\pi k f_0 t + b_k \sin 2\pi k f_0 t)$$
(2.26)

$$= \sum_{k=0}^{\infty} (a_k \cos 2\pi k f_0 t + b_k \sin 2\pi k f_0 t) \quad (2.27)$$

$$\therefore a_k = \begin{cases} c_k + c_{-k} & k \neq 0 \\ c_0 & k = 0 \end{cases}$$
 (2.28)

$$b_k = j(c_k - c_{-k}) (2.29)$$

Using (2.2),

$$c_k = f_0 \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t)e^{-J^2\pi k f_0 t} dt$$
 (2.30)

$$c_{-k} = f_0 \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t)e^{j2\pi k f_0 t} dt$$
 (2.31)

$$a_{k} = c_{k} + c_{-k} = f_{0} \int_{-\frac{1}{2f_{0}}}^{\frac{1}{2f_{0}}} x(t) \left[ e^{-j2\pi k f_{0}t} + e^{j2\pi k f_{0}t} \right] dt$$
(2.32)

$$=2f_0 \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t) \cos(2\pi k f_0 t) dt$$
(2.33)

Parallely,

$$b_k = -2jf_0 \int_{-\frac{1}{2f_0}}^{\frac{1}{2f_0}} x(t) \sin(2\pi k f_0 t) dt \quad (2.34)$$

2.5 Find  $a_k$  and  $b_k$  for (1.1)

**Solution:** Using (2.28) and (2.29) with (2.17),

$$a_{k} = c_{k} + c_{-k} = \begin{cases} \frac{4A_{0}}{\pi(1-k^{2})} & k = even \\ \frac{2A_{0}}{\pi} & k = 0 \\ 0 & k = odd \end{cases}$$
 (2.35)

(2.36)

 $= \sum_{k=1}^{\infty} \left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0 + \sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) - j c_{-k} \sin \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + c_0}_{\text{(2.24)}} + c_0}_{\text{(2.24)}} + \underbrace{\sum_{k=1}^{\infty} \underbrace{\left[ c_{-k} \cos \left( 2\pi k f_0 t \right) \right] + c_0}_{\text{(2.24)}} + c_0}_{\text{(2.24)}$ 

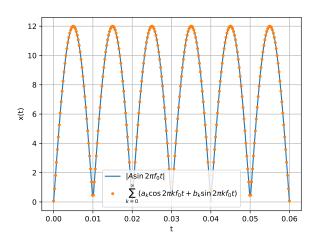

Fig. 2.6.

# 3. Fourier Transform

3.1 The Fourier Transform of g(t) is

$$G(f) = \int_{-\infty}^{\infty} g(t)e^{-j2\pi ft} dt \qquad (3.1)$$

3.2 Show that

$$g(t-t_0) \stackrel{\mathcal{F}}{\longleftrightarrow} G(f)e^{-j2\pi ft_0}$$
 (3.2)

(3.6)

**Solution:** Using (3.2),

$$\mathcal{F}\left\{\delta\left(t-t_{0}\right)\right\} = e^{-j2\pi f_{0}t}\mathcal{F}\left\{\delta(t)\right\} \tag{3.19}$$

$$=e^{-j2\pi f_0 t} (3.20)$$

**Solution:** 

$$\mathcal{F}\{g(t-t_0)\} = \int_{-\infty}^{\infty} g(t-t_0)e^{-j2\pi ft} dt \qquad (3.4) \qquad e^{-j2\pi ft} dt$$

$$= e^{-j2\pi ft_0} \int_{-\infty}^{\infty} g(t-t_0)e^{-j2\pi f(t-t_0)} d(t-\frac{3}{t_0}) \cos(2\pi f_0 t) \stackrel{\mathcal{F}}{\longleftrightarrow} ?$$
Solution:
$$(3.5)$$

$$= e^{-j2\pi f t_0} \int_{-\infty}^{\infty} g(\tau) e^{-j2\pi f \tau} d\tau$$

$$= G(f)e^{-j2\pi f t_0} (3.7)$$

3.3 Show that

$$G(t) \stackrel{\mathcal{F}}{\longleftrightarrow} g(-f)$$
 (3.8)

Solution: From definition of Inverse Fourier Transform,

$$g(t) = \int_{-\infty}^{\infty} G(f)e^{jf2\pi t} df$$
 (3.9)

$$g(-t) = \int_{-\infty}^{\infty} G(f)e^{-jf2\pi t} df \qquad (3.10)$$

Interchange t with f

$$g(-f) = \int_{-\infty}^{\infty} G(t)e^{-jt2\pi f} dt \qquad (3.11)$$

$$= \mathcal{F}\left\{G(t)\right\} \tag{3.12}$$

$$\therefore G(t) \stackrel{\mathcal{F}}{\longleftrightarrow} g(-f) \tag{3.13}$$

3.4  $\delta(t) \stackrel{\mathcal{F}}{\longleftrightarrow}$ ?

**Solution:** 

$$\mathcal{F}\left\{\delta\left(t\right)\right\} = \int_{-\infty}^{\infty} \delta(t)e^{-j2\pi ft} dt \qquad (3.14)$$

$$= \int_{0^{-}}^{0^{+}} \delta(t)e^{-j2\pi ft} dt \qquad (3.15)$$

(3.16)

When  $t \in [0^-, 0^+], e^{-j2\pi ft} \to 1$ . So.

$$\mathcal{F}\left\{\delta\left(t\right)\right\} = \int_{0^{-}}^{0^{+}} \delta(t) dt \qquad (3.17)$$

$$= 1 \tag{3.18}$$

Using (3.8),

3.5  $e^{-j2\pi f_0 t} \stackrel{\mathcal{F}}{\longleftrightarrow} ?$ 

$$e^{-j2\pi f_0 t} \stackrel{\mathcal{F}}{\longleftrightarrow} \delta(f + f_0)$$
 (3.21)

 $\cos(2\pi f_0 t) = \frac{e^{j2\pi f_0 t} + e^{-j2\pi f_0 t}}{2}$ (3.22)

$$\mathcal{F}\left\{\cos(2\pi f_0 t)\right\} = \int_{-\infty}^{\infty} \frac{e^{j2\pi f_0 t} + e^{-j2\pi f_0 t}}{2} e^{-j2\pi f t} dt$$

$$= \int_{-\infty}^{\infty} \frac{e^{j2\pi f_0 t}}{2} e^{-j2\pi f t} + \int_{-\infty}^{\infty} \frac{e^{-j2\pi f_0 t}}{2} e^{-j2\pi f t} dt$$
(3.24)

Using (3.21),

$$= \frac{\delta(f - f_0) + \delta(f + f_0)}{2}$$
 (3.25)

3.7 Find the Fourier Transform of x(t) and plot it. Verify using python.

**Solution:** 

$$X(f) \longrightarrow H(f) \longrightarrow X(f)H(f) = 5$$

3.8 Show that

$$rect(t) \stackrel{\mathcal{F}}{\longleftrightarrow} sinc(f)$$
 (3.26)

Verify using python.

**Solution:** 

$$\mathcal{F}\left\{\operatorname{rect}(t)\right\} = \int_{-\infty}^{\infty} \operatorname{rect}(t) \, e^{-jt2\pi f} \, dt \qquad (3.27)$$

$$= \int_{-\frac{1}{2}}^{\frac{1}{2}} e^{-j2\pi ft} dt \tag{3.28}$$

$$=\frac{e^{-j2\pi ft}}{-j2\pi f}\Big|_{\frac{-1}{2}}^{\frac{1}{2}} \tag{3.29}$$

$$=\frac{e^{-j\pi f} - e^{j\pi f}}{-j2\pi f}$$
 (3.30)

$$=\frac{\sin \pi f}{\pi f} = \operatorname{sinc}(f) \tag{3.31}$$

3.9  $\operatorname{sinc}(t) \stackrel{\mathcal{F}}{\longleftrightarrow}$ ?. Verify using python. **Solution:** Using (3.8),(3.26) and as rect function is even,

 $\operatorname{sinc}(t) \stackrel{\mathcal{F}}{\longleftrightarrow} \operatorname{rect}(f)$  (3.32)

# 4. Filter

- 4.1 Find H(f) which transforms x(t) to DC 5V.
- 4.2 Find h(t).
- 4.3 Verify your result using through convolution.

## 5. FILTER DESIGN

- 5.1 Design a Butterworth filter for H(f).
- 5.2 Design a Chebyschev filter for H(f).
- 5.3 Design a circuit for your Butterworth filter.
- 5.4 Design a circuit for your Chebyschev filter.
